Χαιρετισμός Στ. Γκίκα στο Συνέδριο: «Humboldt Kolleg on Quantum Gravity and Fundamental Interactions»

Ladies and Gentleman,

It is a pleasure and an honor for us, when scientists meet in Corfu every year to exchange knowledge on their subjects. As you may know, many international conferences are held here and we are very happy about it.

Unfortunately this year I can't be with you at the opening of the «Humboldt Kolleg on Quantum Gravity and Fundamental Interactions» organized within the framework of the Corfu Summer Institute. Never the less I would like to cordially welcome all of you, the distinguished scientists and guests who came to Corfu to exchange, interact and work together. Welcome - Kalos irthate!, as we say in Greek.

Dear participants, your conference is held in a beautiful and historic venue and I really hope you will have a very fruitful conference. I also hope to spare some time to visit interesting spots in Corfu and to get in touch with the natural beauty of the island, our tradition, our history and of course to enjoy the Greek hospitality.

I wish you a stimulating conference and a pleasant stay in Corfu.

Stefanos Gkikas
MP for Corfu
