To whom it may concern

Professor George Zoupanos has contributed very significantly to the international research in theoretical particle physics. He has published a number of very important scientific papers which brought him a very strong world-wide recognition.

Professor Zoupanos has paid many long- and short term research visits to the universities and research laboratories all over the world. In particular, he is a frequent visitor to the particle research centre in Munich and to the unique in the world international laboratory CERN in Geneva.

On several occasions, he also visited the Institute of Theoretical Physics in Warsaw, giving lectures and conducting a joint research with us.

Professor Zoupanos frequently participates in international conferences in particle physics as an invited speaker and he himself is the main organizer of the famous in the world annual international school on particle physics in Corfu.

Professor Zoupanos is a renowned international figure.
