

To whom it may concern

Letter of attestation for Professor George Zoupanos

Professor George Zoupanos of the National Technical University, Athens (NTUA) is a leading theoretical physicist in the domain of elementary particle theory. He has been an invited speaker at a number of international schools and conferences, including: main lecturer at the Summer School in Modern Mathematical Physics, Sokobanja, 2001 (where we first met), Zlatibor (Serbia) 2004, Belgrade, 2008; International Workshop "Supersymmetries and Quantum Symmetries" (SQS'09 and SQS'2011) in Dubna (Russia). He is the organizer of a number of Advanced Research Summer Schools and Workshops at Corfu (where I had the privilege to participate in 2005). He has been associate member and welcome visitor at the European Council for Nuclear Research (CERN) where we have also intersected more than once. His prediction of the Higgs mass prior to the LHC observations has been particularly appreciated.

In short, Professor Zoupanos is an internationally known scholar sought after lecturer and a highly esteemed colleague.
